

December 2010

This is the first annual report for the Lakehead Amateur Radio Club's Communication Trailer from July 18, 2003 to November 20, 2010.

The total operating hours for the Communications Trailer for Public Service was 155 hours.

The total distance the trailer travelled was 1171 km or 702.6 miles.

There are no major operating problems with the trailer, but there are a few items that must be attended to in 2011.

These items are:

1. New spare tire
2. Tires to be removed and bearings to be checked and regreased.
3. Tires to be checked out (replace if necessary)
4. Screens on windows to be replaced or repaired
5. All outside lights to be replaced or repaired before the trailer is placed into service in 2011
6. Replace propane tank due to age dating.

The old cell phone was replaced by Tbaytel in November, 2010. The number for the phone remains the same.

Hopefully, a new location can be found to store the trailer for the winter of 2011 (November to May)

This report was written by Robert Hansen VE3RVA, LARC trailer chairman.
